

iQ Plutos Balanced Portfolio

Performance Update | As of 30/11/2024

Risk Level: Medium to High
Inception: 20/10/2018
Investment Horizon: 7 Years
Management Fee: 0.2265%
Indirect Costs: 0.73%

Investment Objective

To achieve RBA Cash +3.4% p.a before fees over rolling seven year periods.

Investment Strategy

The portfolio has exposure to a diverse mix of managed fund investments, which include primarily growth assets and may have some exposure to interest producing assets. Over the long term, the portfolio aims to have a 30% allocation to defensive assets and a 70% allocation to growth assets. Some capital volatility is expected due to the high exposure to growth asset classes.

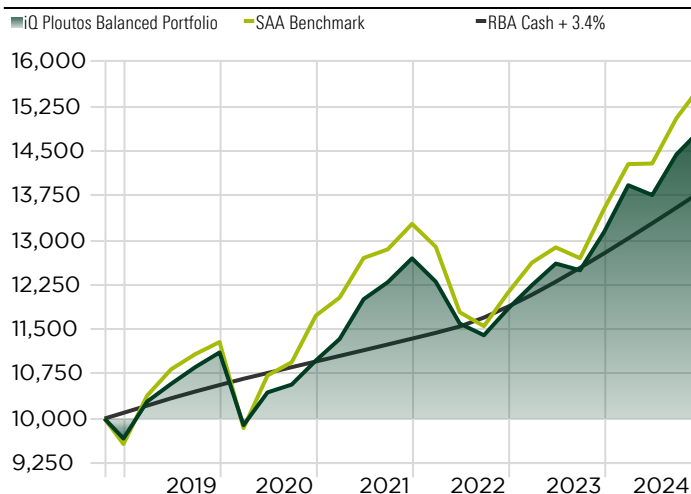

The portfolio is constructed around an asset allocation based on the strategy's long-term objectives. The portfolio and asset allocation are reviewed to adapt to changes in market conditions. The asset allocation, selection and blending of managed funds are actively managed with a strong focus on risk. Fund managers, their funds and the construction of the portfolio are regularly reviewed for suitability and market conditions.

*Investment performance represents modelled performance only and assumes income received is reinvested. Investment returns are calculated before tax and after management fees which are inclusive of GST. An individual investor's performance will differ from the modelled performance depending on factors such as transaction timing, actual management fees, whether income is paid and any divergence from model portfolio weightings. The portfolio may include Funds (including Exchange Traded Funds) which charge management fees and these fees are an additional cost (captured within the indirect costs) to individual investors and impact their return.
